The Global USL Subscription Service

“BCS’ USL Subscription Service has saved us at least 10 man hours per week. But more importantly it has identified possible over-licensing, due to the inaccuracy of our discovery data, in excess of £2,000,000.00.”
IT Asset Controller — Tech Data

The Global Universal Software Library (USL) Subscription Service has been developed to help you, as an Audit Tool Administrator, make sense of your audit data quickly reducing manpower overheads and risk to your organisation.

The USL Subscription Service enables you to:

- Fix The Raw Data – A high percentage of all audit discovery tools present incomplete data with publisher, product and version fields either incorrect or missing
- Identify Commercially Licensable Products – Our report clearly identifies commercial verses non commercial products

Why not test-drive our Audit Data Optimisation Service (USL Subscription) with a Free Data Report?

We can process your audit discovery data and within 48 hours transform it into meaningful, organised and standardised business intelligence. We can provide you with a **Free Report** highlighting areas of risk to your business. In the same report we can show you how to save time and money by demonstrating areas for immediate cost savings.

- Remove Duplicate Install Counts – Most discovery tools report multiple installs of the same product on a machine by machine basis. We will present a report that removes these duplicate installs, providing you with the most complete and accurate software inventory available.

We undertake all of the above completely FREE of charge to demonstrate the power of our Universal Software Library (USL).

Publisher	Application	Version	Total Installs	Duplicate Installs	Duplicate Value
Adobe	Adobe Photoshop Elements	5	147	92	£6,600.00
Adobe	Adobe Creative Suite 4 Master Collection	CS4	15	2	£5,550.00
